## BWT bestcup T BLUE

To enjoy fully aromatic from your Jura coffee machine coffee specialties you need quality coffee beans. However, the influence of the quality of the water should not be underestimated.

The water quality, which presses the Kaffeemüll through the fresh ground, compressed in the brewing coffee co-determines the end result. Of course, the protection of high-quality machine technology is mainly limestone and other minerals also reason for the use of a filter. A calcified coffee machine consumes more energy and requires more time for preparation.

Product features of Jura Claris Blue filter cartridge and the BWT Alternative

- High filter capacity 50 liters (Jura) and approximately 70 liters (BWT) at 10 ° carbonate hardness
